BC STRAIGHT BCSP

FUNCTIONAL AND FLEXIBLE

The BC Lift is designed for straight staircases for both indoor and outdoor installation and can be fitted directly to a wall or supported on stanchions.

The user can operate the lift independently as the barrier arms and ramps are powered. For walk-ingimpaired users, a folding seat can be installed on the lift.

When the lift is not in use, it can be folded and parked and measures only 350 mm. from the wall, allowing clear access to the staircase.

The user can call the lift even when folded.

RELIABLE

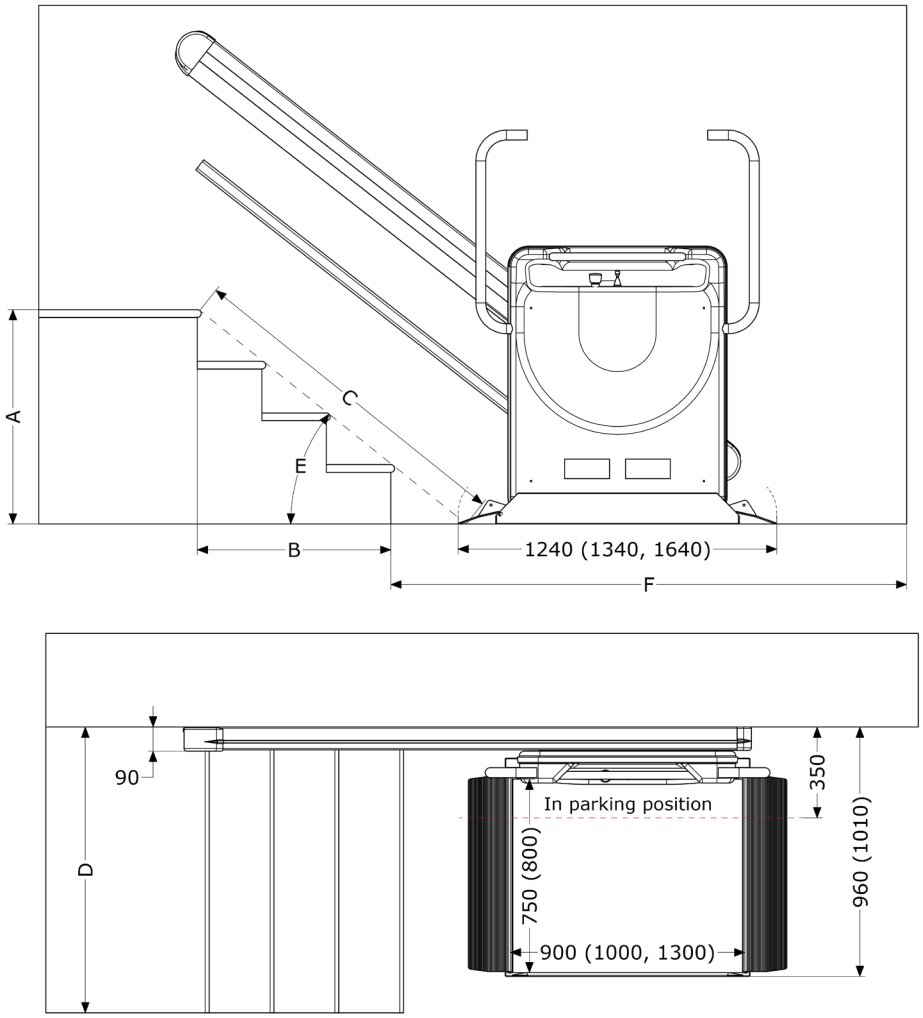
The BC Lift is reliable and complies with european safety standards.

When user drives on to the platform and pushes the joystick in the direction of travel, the barrier arms and ramps automatically fold and close. The lift can begin its travel when the barrier arms and ramps are folded and in place.

The lift stops automatically at the upper and lower landings

The user can stop the lift any time. The lift stops automatically if it meets an obstruction on the staircase.

The barrier arms and ramps are pressure sensitive also the platform is fitted with a pressure sensitive undertray.



TECHNICAL INFORMATION:

SAFETY FEATURES:

- Rack and pinion drive
- Overspeed governor
- Low voltage (25 volt) controls
- Manual hand-wind
- Emergency stop buttons
- Key-switched controls
- Thermal overload
- Electrical components to iP65
- Pressure sensitive ramps and undertray

TECHNICAL DATA:

- Anodised aluminium rail with 80 x 160 mm. profile
- 225 kg. safe working load
- 20-50 degree stair angle
- Speed 0.12 m/sec.
- Drive motor 400 watts
- Soft start
- Standard platform sizes 750x900 mm. and 800 x 1000 mm.
- Both in and out door installation

OPTIONS:

- Stanchions
- Fold down seat
- Remote
- Wanderlead
- Special extra small or extra large platform size.
- Special 300 kg. load
- Colour in all RAL-codes.
